About

Dr Niveditha Devasenapathy is Head of the Academic Clinical Trials Unit, The George Institute for Global Health (TGI), India. She is a medical doctor trained in clinical research methods and applied statistics with over 15 years of experience in clinical and public health research and teaching research methods. Her research work is focused on generating quality evidence to improve patient care in resource poor settings. She is passionate about research capacity strengthening and has designed and delivered several training programs for national and international audience. She co-leads the research capacity strengthening pillar of the NIHR-Global Health Research Centre for Non communicable Diseases and Environmental change (NIHR-GHRC (NCDs & EC)). Her research work span across several health topics including maternal and child health, rheumatic heart disease, coronary heart disease and osteoarthritis. She is a recipient of the prestigious DBT/Wellcome Trust-India Alliance Intermediate Clinical and Public Health fellowship (2020) for the design and evaluation of a mobile technology-based post knee arthroplasty rehabilitation monitoring strategy. Her previous position was an Associate Professor at the Indian Institute of Public Health, Public Health Foundation of India.
